Dear Hiring Team,

I am writing to you today to apply for the open position of Android Developer. I came across this open position through LinkedIn.

I see that company is looking for an enthusiastic, collaborative & flexible person, I feel I have a strong connection to the position. In my last project, I was working as an Android/Flutter developer, a week before the delivery we were having product demo meeting along with the top management, & we (dev team) were given the feedback to make multiple changes in UI which was also impacting functionality of the frontend mobile application. So considering we could not delay the delivery, so we had to make the changes quickly without breaking the functionality. I immediately proposed a strategy (based on skills of each of the developers) to implement the changes as fast as possible while finishing automation testing on time. Finally, with the team work and great co-ordination we made to the production without a single post deployment issue.

I noticed that Fyber develops highly technical platforms and tools for smarter mobile applications. Company supports the app developer & publisher community by providing cutting edge solutions to build optimized mobile app solutions. As it offers a position of Android Developer, which starts from fostering team responsibility to design & develop applications from bi directional knowledge sharing with business specialists to collaborating with development & QA colleagues; an enthusiastic problem solver like me is excited to be part of this interdisciplinary and multicultural team.

Contributions to my current Flutter developer role, and this field at-large, revolve around my essential talents in Flutter, Firebase, Android, Java, Kotlin, Dart, Python, Django, Unix, Jenkins, Git, GitHub, php, xml and Json.

I have strong belief that I can be an ideal fit for this position considering my overall skills and profile match with the company's requirements. In case, I am offered with the opportunity, getting employment visa from India will not be challenge as I can take care of it myself and join you within a period of 2 months.

Thank you for your valuable time for considering me for the position. I have included my resume and other important documents with this application. I will be delighted to have opportunity to discuss further personally.

Sincerely,

Jay Sharma,
